[Wwww.six1.net](http://www.six1.net)

***U-DIAG-II stands
for***

***-simple usage
-comprehensive display
-operation by touchscreen
-expandable
-softwareupdate by USB***

***U-DIAG-II was developed for
practical use.***

***It assists you in a perfect way
when tuning or diagnosing your
engine***

***No more flipping needles like on a
usual analogue device, direct and
simple indication
1 mbar display accuracy***

***U-DIAG-II shows directly, where
adjustment is needed***

U-DIAG-II cannot do miracles!

***Even the device is comprehensive
and easy to use, it cannot do
miracles.***

***What it can do, is provide you all
the information to synchronise
your engine as good as possible.***

***You can use it on BMW K75,
K100, K1100 to read and reset
error codes from ABS brains
(V1.5, V1.6 and V2) and the
Bosch Motronic
V2.1 and V2.2***

***Errors are displayed in readable
text, not numeric codes!***
